

COMPUTER LEARNING OPPORTUNITIES FOR GRADE SIX PUPILS OF EULOGIO RODRIGUEZ INTEGRATED SCHOOL

Jyr Marie V. Reyes

College of Computer Studies and Engineering

The study examines service learning as a pedagogical tool that will strengthen our collaborative partnership with the community. The study aimed to know the impact of the service learning offered by the CSE-IT to the community, to determine how we can enhance the computer service learning opportunities we offer, and to identify the opinions, problems and suggestions our community partners have stated to address them. Descriptive statistics were used to analyze the collected data. The findings revealed that the competent computer skills of the participants have improved. Participants strongly agree that the computer literacy programs are relevant and meaningful to the community, and therefore, continuous offering of our service learning will benefit more people from different sectors of the community.
